PROFILE

CSE undergraduate at United International University passionate about building practical, code-driven solutions. Focused on UI/UX design, software quality assurance, and Python development. Believes interfaces should feel inevitable, code should read like prose, and quality is designed in, not bolted on.

EDUCATION

B.Sc. in Computer Science & Engineering 2023 - Present
United International University, Dhaka
Foundations in algorithms, OOP with Java, and software engineering practice.

SKILLS

Design: UI/UX, Figma, Adobe XD, Prototyping, Design Systems
Engineering: Python, Java, OOP, Git, VS Code
Quality: SQA, Test Design, Selenium, Bug Reporting
AI (learning): Machine Learning, Computer Vision, LLMs, NumPy

SELECTED PROJECTS

Attendly 2025 - UI/UX Case Study
A calm attendance & schedule companion for university students. Full design process: interviews with 12 classmates, journey mapping, wireframes, and a polished Figma prototype tested across two iterations.
Stack: Figma, User Research, Prototyping

BugLens 2025 - SQA + Python
A lightweight test-automation dashboard that runs Selenium suites and visualises flaky tests over time. Written to make quality visible - 40+ automated cases against a demo storefront.
Stack: Python, Selenium, PyTest, Flask

NoteMuse 2024 - Java
A desktop study-notes manager with tagging, search and spaced-repetition reminders. An OOP course project taken seriously: layered architecture, unit tests, and a UI that respects the reader.
Stack: Java, JavaFX, SQLite, JUnit

FOCUS & GOALS

- Building toward machine learning, computer vision and LLM-powered products - humane AI with thoughtful interfaces.
- Open to internships in UI/UX design, software quality assurance, and Python/backend development.
- Interested in design collaborations and interesting real-world problems.

INTERESTS

Human-computer interaction, accessible design, test automation, open-source software, and creative coding.
